

4-H Pocket Folder

You can add your Cooperative Extension mark and/or another 4-H Emblem and the contact information for your office on the back of this folder. These additions must be completed by the pre-press department at a high-quality print shop. Although the Zip file you downloaded from the 4-H Brand Network has all the files the printer will need to reproduce the folder (including the Quark design file, fonts and 4-H Emblem), you will need to provide your printer with a high resolution version (a minimum of 300 dpi as an EPS or TIF file) of your Cooperative Extension mark. A .gif or .jpeg file downloaded or copied from a Web site is NOT print publication quality and is NOT ACCEPTABLE.

Give the Zip file you downloaded from the 4-H Brand Network, the high resolution file of your Cooperative Extension mark, the quantity of folders you want to order and the following specifications to the printer:

Size: 19.5 x 16.5 + Bleed Flat; 9 x 12 FOLDED

Inks: 4/0 - 4CP

Paper: 120# Opus Dull Cover

Bindery: Two 4.5" Pockets; Die cut, Score, Glue, Fold and Carton

Special: Flood UV Covers 1 and 4

Quark files provided.
