

# Year-Round Training Guide

## MODULE 7: **An Experiential Model of Building Robots**

## MODULE 7: **An Experiential Model of Building Robots**

### ***4-H Robotics: Engineering for Today and Tomorrow***

MODULE 7: **An Experiential Model  
of Building Robots**

# 4-H Robotics Curriculum

*4-H Robotics Introduces Youth to:*

- Basic physical science concepts related to robotic systems
- The Scientific Inquiry Process
- The Engineering Design Process
- Technology tools for learning and communications
- An exploration of SET careers

## 4-H Robotics Curriculum

- **Virtual Robotics:** Youth utilize an interactive computer game environment to learn about the science and engineering of robots.
- **Junk Drawer Robotics:** Youth make use of everyday objects to design, build and learn about robots.
- **Robotics Platforms:** Youth employ robotics kits to understand robotics and programming and develop their own robot designs.

## MODULE 7: An Experiential Model of Building Robots

### Track 1:

# Virtual Robotics

***Youth build skills and knowledge about robotics as they play an interactive computer game.***

The learning experience includes videos, simulations, and animations—all in an interactive virtual robotics lab.

Curriculum is delivered on a DVD.

**Track 2:**

# ***Junk Drawer Robotics***

***Youth design, construct and test robots that lift, move or float.***

Each level focuses on one aspect of robotics and the science, engineering and technology behind it.

Designed to be a teen-led program.

Curriculum includes three printed presenter's guides and a youth Robotics Notebook.

**Track 3:**

# **Robotics Platforms**

***Youth apply the engineering processes of designing, building and programming robots.***

Youth build skills and knowledge and apply what they have learned to a challenge activity.

Curriculum is delivered on a DVD.

Makes use of a commercial robotic kit such as LEGO® MINDSTORMS®, VEX®, TETRIX® or CEENBoT™.

## MODULE 7: **An Experiential Model of Building Robots**

**NXT Robots**

# LEGO® Robotics Kits

**RCX (1998)  
Brick**

**NXT (2006)  
Kit**

**EV3 (2013)  
Kit**

## MODULE 7: An Experiential Model of Building Robots

# Robotics Platforms

## MODULE 7: An Experiential Model of Building Robots

# Build a Robot!

## Module 1, Page 3

Module 10

Level 3

Module 11

robots can

### Build A Robot!

**BUILDING ACTIVITY**

Build a three-motor robot using the online build plans for your specific kit titled **Three-Motor Robot**

Links to build instructions:

LEGO NXT

VEX

### Be A Robotics Engineer

**LEARNING CHECK**

Think about these questions so you are ready to discuss them.  
Record your ideas in your Robotics Notebook

## MODULE 7: An Experiential Model of Building Robots

# Cow-Bot

**Build Plans for Cow-Bot**

October 2009

## MODULE 7: An Experiential Model of Building Robots

# Cow-Bot- 2

**Build the Wheel Base**

## Cow-Bot- 3

**Build the Wheel Base**

## MODULE 7: An Experiential Model of Building Robots

# Cow-Bot- 4

**Build the Wheel Base** (continued)

## Cow-Bot- 5

**Add Rear Wheels**

## Cow-Bot- 6

**Mount NXT Brick**

## MODULE 7: An Experiential Model of Building Robots

# Cow-Bot- 7

Mount an axle, inner nut and wheel on each left and right motor (we will use the middle motor later).

## Mount NXT Brick and Drive Wheels

## Cow-Bot- 8

**IDEA:** Try connecting the left and right motor to ports B and C  
and the middle motor to port A.

### Route Cables from the Motors to the NXT Brick

# MODULE 7: An Experiential Model of Building Robots

## My Buddy The Robot

## Robotics Notebook

### Program your Buddy

Decide with your buddy who will be the programmer and who will be the robot (you can switch roles after the first activity). Choose a task for your buddy the robot to do in six steps or less.

**Example:** Pick up a ball out of a bucket on the other side of the room. Complex tasks like "walk over to the bucket" need to be made clear, like "Walk forward 15 steps and stop. Bend 90 degrees forward."

- Step 1 \_\_\_\_\_ 
- Step 1 \_\_\_\_\_
- Step 1 \_\_\_\_\_
- Step 1 \_\_\_\_\_
- Step 1 \_\_\_\_\_
- Step 1 \_\_\_\_\_

End Program

Use the space below to sketch the path you wanted your Buddy the Robot to follow.

**Robot:** Be very careful to only do exactly what the programmer says to do and nothing more.

## Go Bot, Go!

Mark the settings for your motor command and sketch your robot's path.

Direction	↑	↓	↻
Steering	Left	Right	
Power/Speed	_____ %		
Duration	_____ unlimited	_____ degrees	_____ rotations _____ seconds
How to Stop	<input type="radio"/> Brake <input type="radio"/> Coast		

Change ONE setting in your motor command and mark it below. Predict what the robot will do, try it out and then sketch your robot's actual path.

What should it do? \_\_\_\_\_

Direction	↑	↓	↻
Steering	Left	Right	
Power/Speed	_____ %		
Duration	_____ unlimited	_____ degrees	_____ rotations _____ seconds
How to Stop	<input type="radio"/> Brake <input type="radio"/> Coast		

Reset the last setting you made and then change a new setting. Predict and sketch the robot's path.

What should it do? \_\_\_\_\_

Direction	↑	↓	↻
Steering	Left	Right	
Power/Speed	_____ %		
Duration	_____ unlimited	_____ degrees	_____ rotations _____ seconds
How to Stop	<input type="radio"/> Brake <input type="radio"/> Coast

## Closing and Questions

- Developed personal knowledge to draw upon when leading *Robotics Platforms*
- Identified the components of the LEGO® MINDSTORMS® NXT Kit and used it to build and program a robot
- Developed strategies for implementing the Engineering Design Process and Experiential Learning Model with youth
