

## Create Your Own Insect

Discuss the parts that all insects have to their bodies (head, thorax, abdomen, legs). To create your insect, answer the following questions.

- How does your insect travel? (Does it fly? Crawl? Swim? Slink?)
- What "buggy" things does it do during the day (or night)?
- What does your personal insect eat?
- What type of protection will your insect have? (For example, it can have a stinger or it can have coloring that lets it blend in with objects around it.)
- Think about all the things your insect does. Now draw your insect on a piece of paper. Remember to include all the main parts described above.
- My insect is called. . .
