

Drums

Kids Love Drums!

Materials:

- *Industrial size cans with both ends removed. Use a can opener that leaves smooth edges.
- *Wide clear tape
- *Paper and markers to make a design to go into the drum
- *Spray paint optional

Directions:

1. Take the paper off of the can. Spray paint ahead of time.
2. Make a work of art to use in the drum.
3. Put layers of the tape over the one end of the drum. The tape should only hang over the can edge about an inch or so.
4. After you have covered the whole top of the can several times, place the art work on the top of the tape.
5. Put a few more layers over the picture.

Now you can play! You can also scrape the sides of the can for another sound.

If you sew buttons on the ends of the fingers of gloves, you can make more neat sounds. Like dancing fingers!!!
