

## Pig Card Game

**Number of Players** – Three to thirteen

**The Pack** – Four cards representing any one denomination, for each player in the game; thus, four players would use a 16-card pack consisting of four aces, four kings, four queens and four jacks.

**The Shuffle and Deal** – Any player shuffles the pack thoroughly and deals four cards, one at a time, to each player.

**Object of the Game** – To make a group of four of a kind in your hand, or not to be the last to notice when someone else does so.

**The Play** – The players look at their hands; then every player passes one card to the player at his left and picks up the card passed by the player at his right. When any player has in his hand four cards of one denomination, as four kings, he stops passing or picking up cards and puts his finger to his nose. The other players must immediately stop passing and each must put his finger to his nose. The last to do this is the Pig.
