Contents

Conceptual Framework.................................................................................................................2

1. The Natural Water Cycle........................................................................................................4
   ◆ Activity 1: Where in the World is Water?
   ◆ Activity 2: H₂O by the Numbers
   ◆ Activity 3: Can You Make it Rain?
   ◆ Activity 4: Where Water Flows: An Introduction to Watersheds

2. Human Interventions in the Water Cycle..............................................................................26
   ◆ Activity: From the Storm Clouds to the Ocean: Chance Encounters of Wandering Water

3. Water as an Available Resource: The Urban/Rural Interface...........................................54
   ◆ Activity 1: Watersheds and the Urban/Rural Interface
   ◆ Activity 2: Population Growth and the Changing Face of the Urban/Rural Interface: 2010→2025

4. Mapping Natural Watersheds..............................................................................................72
   ◆ Activity 1: Water Flows Downhill: An Introduction to Topographical Maps
   ◆ Activity 2: Mapping Locations of Point and Nonpoint Source Pollutants in Watersheds: Predicting Impacts; Identifying Solutions

5. Service Learning Projects in your Watershed.....................................................................103
   ◆ Step 1: Identifying Needs in Your Community
   ◆ Step 2: Preparing the Project
   ◆ Step 3: Experiencing Service
   ◆ Step 4: Evaluating the Project
   ◆ Step 5: Sharing the Project

6. Teens Teaching Younger Youth..........................................................................................121
   ◆ Activity 1: The Earth’s Water: Streams, Lakes, Oceans, & More!
   ◆ Activity 2: How Much Water Do We Use?
   ◆ Activity 3: What Goes Down Your Drain?

Glossary......................................................................................................................................153
