

# GARDENING TIPS

Here Are Some Gardening Tips To Help Your Garden Flourish!

## 1. ALL PURPOSE SOIL

All-purpose soil mix is great to use when starting off your garden!

## 2. EPSOM SALT

You can sprinkle a small amount of epsom salt on the root of your tomatoes to replenish the magnesium sulfate in the soil. In other words, you'll have a sweeter and tastier tomato!

## 3. WATERING

The best time to water is early morning or late evening. Watering during the heat of the day can cause problems for your crops.

## 4. FENCING YOUR CROPS

If you have animals near or around you, it is good to put up a fence to keep them out. For example, if you have chickens, put up chicken wire to keep them from eating your crops.

## 5. COMPOST/MANURE

To add moisture back into your soil, use a compost or manure. The smell may bother you, but your crops will appreciate it!
