

Before we start a pitch, we want to carefully consider what we'd like to say. This starts with taking another look at our idea.

Fill out the charts below:

Problem Statement	
Who are the people involved in the problem?	
What is the situation?	

Methods

How did you come up with your idea?

How did you conduct interviews?

How did you make your prototype?

Solution Architecture

What solution did you come up with?	
What features does your design have?	
Do you have a plan to implement your solution?	
What challenges do you anticipate in implementing your design?
